

# Motorized Tripod with 3.2m Boom **SJJ-M10 MOTOR**

## **The Nivel System SJJM-10 MOTOR**

is a stable, aluminum tripod for work in all conditions. Strong safety clamps ensure maximum stability.

## **Motorized Tripod Boom System**

The tripod allows for motorized up and down movement. Control is performed remotely using the remote control.

## **Auto Alignment**

Thanks to the CLS-10 laser sensor, you can use the auto alignment function. The tripod adjusts its height so that the laser beam aligns with the sensor's center point.

## **Applications**

For cross-line lasers.
